FILATI BELLI PER NATURA

Le fibre: cotone, lino, seta sono fibre naturali utilizzate in purezza.

I colori: sono estratti dalle radici, le foglie e il legno di piante tintorie reperibili durante tutto l'anno: Campeggio, Robbia, Castagno, Mimosa, Solidago, Bixa ed Eucalipto.

In resa sul filato i colori sono delicati e acquerellati. Il processo di tintura è completamente naturale senza utilizzo di composti chimici sintetici e ha un minor impiego di acqua rispetto ad una tintura tradizionale.

LOVELY YARNS BY NATURE

Fibers: cotton, linen and silk are natural and untreated fibers.

The colours: are extracted from the roots, leaves and wood of various dyeing plants available all year round: Blackwood, Madder, Solidago, Chestnut, Mimosa, Bixa, and Eucalyptus. Once on the yarn the colours are delicate, watercolor-like. It's an entirely natural dyeing process with no synthetic chemicals and uses less water than traditional dyeing methods.
